# COMPANY PROFILE

## 企业简介

山东优合新材料有限公司是一家新型材料制造企业，聚焦于高性能高分子材料的产品开拓，为客户提供研发、检测、制造、进出口服务一体化解决方案。公司专业生产PVC改性颗粒，下游覆盖航空航天、轨道交通、新能源汽车、建筑材料、电子、电力、电器、通讯、包装材料、工业消防、日常消费品等领域。产品远销50多个国家和地区，为400多家企业提供产品和服务。

我们坚守环保立于心，质量立于本，创新立于首的理念：

环保立于心 - 产品符合ROHS 2.0、REACH、PAHS、EN71、FDA等环保标准；

质量立于本 - 原材料由国内外一线品牌供应，生产采用6S品控管理体系；

创新立于首 - 积极参与多项产品的国标制定，与全球的学术界、产业界伙伴一起，深度参与产品的交流、研发、生产，共同推动新材料的创新升级，不断为行业和社会创造价值。

公司将致力于持续不断的研发创新与产品升级，力争成为行业领军企业。在为客户提供高质量产品服务 and 解决方案的同时，让客户体验并收获我们为其所创造的价值。

Shandong Yoho New Materials Co., Ltd. is a new materials manufacturing company that focuses on the development of high-performance polymer materials, offering customers integrated solutions including research and development, testing, manufacturing, and import-export services. The company specializes in producing modified PVC granules, with downstream applications spanning aerospace, rail transportation, new energy vehicles, building materials, electronics, power, electrical appliances, communications, packaging materials, industrial fire protection, and daily consumer goods. Its products are sold to over 50 countries and regions, serving more than 400 enterprises.

We adhere to the philosophy of environmental protection at heart, quality as our foundation, and innovation as our priority:

Environmental protection at heart - Products meet RoHS 2.0, REACH, PAHS, EN71, FDA, and other environmental standards;

Quality as our foundation - Raw materials are supplied by top domestic and international brands, and production follows the 6S quality control management system;

Innovation as our priority - Actively participating in the formulation of national standards for multiple products, cooperating closely with global academic and industrial partners in product exchange, research and development, and production, jointly driving the innovation and upgrading of new materials, continuously creating value for the industry and society.

The company is dedicated to ongoing research, innovation, and product upgrades, striving to become a leading enterprise in the industry. While providing customers with high-quality products, services, and solutions, we aim to ensure that customers experience and gain the value we create for them.

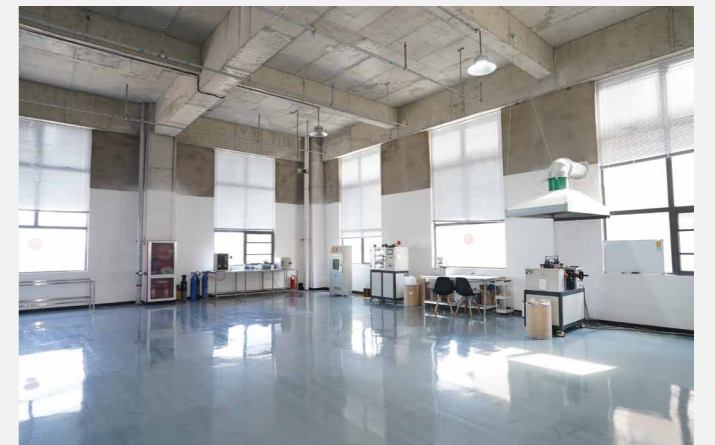

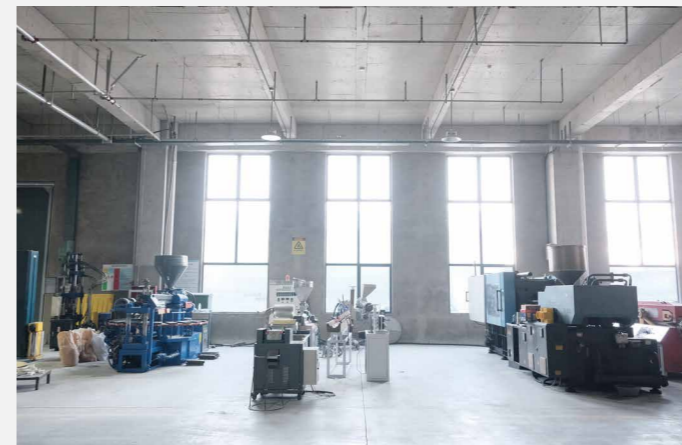

YOHIO 优合

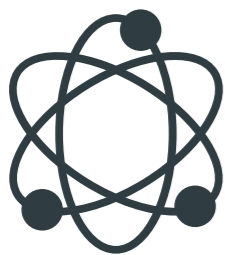

# R&D EQUIPMENT

## 研发设备

## 下游覆盖

产品覆盖航空航天、轨道交通、新能源汽车、建筑材料、电子、电力、电器、通讯、包装材料、工业消防、日常消费品等领域，适配多行业高标准配套需求，应用场景丰富。

The products cover aerospace, rail transit, new energy vehicles, building materials, electronics, electric power, electrical appliances, communications, packaging materials, industrial fire protection, daily consumer goods, and other fields, adapting to the high-standard supporting needs of multiple industries, with a wide range of application scenarios.

## 研发实力

与青岛科技大学共建联合研发实验室，深化产学研协同创新，专注技术攻关与产品迭代，持续为市场提供高性能、高附加值的创新产品。

Together with Qingdao University of Science and Technology, we have established a joint research and development laboratory, deepening industry-university-research collaborative innovation, focusing on technological breakthroughs and product iteration, and continuously providing the market with high-performance, high value-added innovative products.

## 品质管控

推行 6S 管理体系，构建全流程质量管控体系，从原料到成品层层严苛检测，确保产品性能稳定可靠，以高标准铸就品质。

Implement the 6S management system and establish a comprehensive quality control system throughout the entire process, conducting rigorous inspections from raw materials to finished products to ensure stable and reliable product performance, and achieving high quality standards.

## 全程服务

免费样品、上门调试、支持客户产品升级与性能优化，全程高效服务，助力客户需求转化落地。

Free samples, on-site debugging, support for customer product upgrades and performance optimization, efficient service throughout, helping to turn customer demands into reality.
